Author Index

Alonso, M.A., see López-Guerrero, J.A. (20) 23
Arbuckle, M., see Dolan, A. (20) 97
Arko, E.F., Daksis, J.I. and Chan, V.-L.
Further characterization of *ts*1-8, a mutant of herpes simplex virus type 1 (20) 71

Bartiss, A., see Lacy, J. (20) 85
Beaty, B.J., see Chandler, L.J. (20) 181
Becker, Y., see Rösen-Wolff, A. (20) 205
Berkowitz, C., see Rösen-Wolff, A. (20) 205
Brown, I.S.M., see Wroblewska, Z. (20) 193

Carrasco, L., see López-Guerrero, J.A. (20) 23
Chan, V.-L., see Arko, E.F. (20) 71
Chandler, L.J., Hogge, G., Endres, M., Jacoby, D.R., Nathanson, N. and Beaty, B.J.
Reassortment of La Crosse and Tahyna bunyaviruses in *Aedes triseriatus* mosquitoes (20) 181
Coleman, D.L., see Lacy, J. (20) 85
Cox, S., see Dasmahapatra, B. (20) 237

Daksis, J.I., see Arko, E.F. (20) 71
Darai, G., see Rösen-Wolff, A. (20) 205
Dasmahapatra, B., Rozhon, E.J., Hart, A.M., Cox, S., Tracy, S. and Schwartz, J.
Cell-free expression of the coxsackievirus 3C protease using the translational initiation signal of an insect virus RNA and its characterization (20) 237
De, L., see Yang, C.-F. (20) 159
Delmas, B. and Laude, H.
Carbohydrate-induced conformational changes strongly modulate the antigenicity of coronavirus TGEV glycoproteins S and M (20) 107
Dolan, A., Arbuckle, M. and McGeoch, D.J.
Sequence analysis of the splice junction in the transcript of herpes simplex virus type 1 gene UL15 (20) 97
Domingo, E., see Yáñez, R.J. (20) 265
Dougherty, E.M., see McClintock, J.T. (20) 133

Endres, M., see Chandler, L.J. (20) 181

Fourel, I., see Li, J.-s. (20) 11
Fraser, N.W., see Wroblewska, Z. (20) 193
Fresno, M., see López-Guerrero, J.A. (20) 23

Guthrie, K.P., see McClintock, J.T. (20) 133
Guzo, D., see McClintock, J.T. (20) 133

Hart, A.M., see Dasmahapatra, B. (20) 237
Hattori, M., see Niikura, M. (20) 31
Henley, D.C. and Weir, J.P.
The relative stability of selected herpes simplex virus type 1 mRNAs (20) 121
Hirasawa, T., see Iwata, H. (20) 273
Hogge, G., see Chandler, L.J. (20) 181
Holloway, B.P., see Yang, C.-F. (20) 159

Iwata, H., Hirasawa, T. and Roy, P.
Complete nucleotide sequence of segment 5 of epizootic haemorrhagic disease virus; the outer capsid protein VP5 is homologous to the VP5 protein of bluetongue virus (20) 273

Jacoby, D.R., see Chandler, L.J. (20) 181
Jaquet, C., see Li, J.-s. (20) 11

Kew, O.M., see Yang, C.-F. (20) 159

Lacy, J., Bartiss, A. and Coleman, D.L.
Conversion of a human B cell lymphoma line by Epstein-Barr virus is associated with increased tyrosine phosphorylation of a 50 kilodalton cytosolic protein (20) 85
Lamadé, W., see Rösen-Wolff, A. (20) 205
Laude, H., see Delmas, B. (20) 107
Li, J.-s., Fourel, I., Jaquet, C. and Trépo, C.
Decreased replication capacity of a duck hepatitis B virus mutant with altered distal pre-S region (20) 11
López-Guerrero, J.A., Martínez-Abarca, F., Fresno, M., Carrasco, L. and Alonso, M.A.
Cell type determines the relative proportions of (−) and (+) strand RNA during poliovirus replication (20) 23

MacLean, A., see Wroblewska, Z. (20) 193
Magnusson, G., see Risuleo, G. (20) 147
Martínez-Abarca, F., see López-Guerrero, J.A. (20) 23
Matsubara, Y., Watanabe, R. and Taguchi, F.
Neurovirulence of six different murine coronavirus JHMV variants for rats (20) 45
Matsuura, Y., see Niikura, M. (20) 31
McClintock, J.T., Guzo, D., Guthrie, K.P. and Dougherty, E.M.
DNA-binding proteins of baculovirus-infected cells during permissive and semipermissive replication (20) 133
McGeoch, D.J., see Dolan, A. (20) 97
McKee, T.A. and Preston, C.M.
Identification of two protein binding sites within the varicella-zoster virus major immediate early gene promoter (20) 59
Melucci-Vigo, G., see Risuleo, G. (20) 147
Mikami, T., see Niikura, M. (20) 31
Moya, A., see Yáñez, R.J. (20) 265

Nathanson, N., see Chandler, L.J. (20) 181
Nevins, J.R.
Utilization of cellular transcription factors for adenovirus-induced transcription (20) 1
Niikura, M., Matsuura, Y., Hattori, M., Onuma, M. and Mikami, T.
Characterization of haemagglutinin-neuraminidase glycoprotein of Newcastle disease virus expressed by a recombinant baculovirus (20) 31

Onuma, M., see Niikura, M. (20) 31
Otte, J., see Wroblewska, Z. (20) 193

Pallansch, M.A., see Yang, C.-F. (20) 159
Preston, C.M., see McKee, T.A. (20) 59

Risuleo, G., Melucci-Vigo, G. and Magnusson, G.
Reduced *Polyomavirus* DNA replication as a consequence of a late-region deletion that results in early mRNA instability (20) 147
Rösen-Wolff, A., Lamadé, W., Berkowitz, C., Becker, Y. and Darai, G.
Elimination of UL56 gene by insertion of LacZ cassette between nucleotide position 116030 to 121753 of the herpes simplex virus type 1 genome abrogates intraperitoneal pathogenicity in tree shrews and mice (20) 205
Roy, P., see Iwata, H. (20) 273
Rozhon, E.J., see Dasmahapatra, B. (20) 237

Schwartz, J., see Dasmahapatra, B. (20) 237
Slavicek, J.M.
Temporal analysis and spatial mapping of *Lymantria dispar* nuclear polyhedrosis virus transcripts and in vitro translation polypeptides (20) 223
Spivack, J.G., see Wroblewska, Z. (20) 193
Stetler, D.A., see Yang, C.L. (20) 251

Taguchi, F., see Matsubara, Y. (20) 45
Tracy, S., see Dasmahapatra, B. (20) 237
Trépo, C., see Li, J.-s. (20) 11

Viñuela, E., see Yáñez, R.J. (20) 265

Watanabe, R., see Matsubara, Y. (20) 45
Weaver, R.F., see Yang, C.L. (20) 251
Weir, J.P., see Henley, D.C. (20) 121
Wroblewska, Z., Spivack, J.G., Otte, J., Brown, I.S.M., MacLean, A. and Fraser, N.W. (20) 193

Yáñez, R.J., Moya, A., Viñuela, E. and Domingo, E.
Repetitive nucleotide sequencing of a dispensable DNA segment in a clonal population of African swine fever virus (20) 265
Yang, C.-F., De, L., Holloway, B.P., Pallansch, M.A. and Kew, O.M.
Detection and identification of vaccine-related polioviruses by the polymerase chain reaction (20) 159
Yang, C.L., Stetler, D.A. and Weaver, R.F.
Structural comparison of the *Autographa californica* nuclear polyhedrosis virus-induced RNA polymerase and the three nuclear RNA polymerases from the host, *Spodoptera frugiperda* (20) 251

Virus Research, 20 (1991) 291–292

Subject Index

African swine fever virus, (20) 265
Antigenicity, (20) 107
Autographa californica, (20) 251

Baculovirus, (20) 133; (20) 223; (20) 251
Baculovirus vector, (20) 31
B lymphocyte, (20) 85
Bunyavirus, (20) 181

Cell free translation, (20) 237
Coronavirus, (20) 107
Coxsackievirus B3, (20) 237
3C protease, (20) 237

Delayed host shutoff, (20) 71
Deletion mutants, (20) 147
DHBV mutant, (20) 11
Distal pre-S region, (20) 11
DNA-binding proteins, (20) 133
DNA polymerase, (20) 11
cDNA sequence, (20) 205

Epithelial cell, (20) 23
Epitope, (20) 107
Epizootic hemorrhagic disease virus, (20) 273
Epstein-Barr virus, (20) 85

Gene expression, (20) 121; (20) 223
Gene UL15, (20) 97
Genome segment M5, (20) 273
Genotype-specific detection, (20) 159
Glycoprotein, (20) 107
Glycoprotein B, (20) 71
Glycosylation, (20) 107

Haemagglutinin-neuraminidase, (20) 31
Herpes simplex virus, (20) 97
Herpes simplex virus type 1, (20) 71; (20) 121; (20) 193

Immortalization, (20) 85
In vitro amplification, (20) 159

La Crosse virus, (20) 181
Late gene, (20) 251
Latency, (20) 205
Latency associated transcript, (20) 193
Latent infection, (20) 193
Leukocyte, (20) 23
Lymantria dispar nuclear polyhedrosis virus, (20) 223

Mosquito, (20) 181
Multigene family, (20) 265
Murine coronavirus JHM, (20) 45
Mutation frequency, (20) 265

Nerve cell, (20) 23
Neurovirulence, (20) 45
Newcastle disease virus, (20) 31

Outer capsid protein VP5, (20) 273

Pathogenicity, (20) 205
Permissive, (20) 133
Poliovirus, (20) 23
Polymerase chain reaction, (20) 159; (20) 205
Polyomavirus, (20) 147
P1 processing, (20) 237
Protein binding to DNA, (20) 59

Reassortment, (20) 181
Repetitive sequencing, (20) 265
Replication capacity, (20) 11
E-mRNA instability, (20) 147
RNA polymerase, (20) 251
mRNA stability, (20) 121
RNA transcript, (20) 205

Semipermissive, (20) 133
Spliced gene, (20) 97
Splice site, (20) 97

Spodoptera frugiperda subunit structure, (20) 251
S protein, (20) 45

Tahyna virus, (20) 181
Temperature sensitive, (20) 71
TGEV, (20) 107
Transcription, (20) 223
Translation, (20) 223
Transmissible gastroenteritis virus, (20) 107
Tyrosine phosphorylation, (20) 85

Vaccine-related polioviruses, (20) 159
Varicella-zoster virus transcription, (20) 59
Virus replication, (20) 23
